# RECRUITMENT ANALYTICS DASHBOARD

Power BI Project – Summary Report

## 1. Project Overview

This project presents an interactive recruitment analytics dashboard developed in Microsoft Power BI. The dashboard analyzes the recruitment funnel from Applications through Screening, Interviewed, Offered and Hired, along with recruitment sources, departments, candidate outcomes, stage duration and time-to-hire.
The main objective is to understand recruitment performance, identify funnel drop-offs, compare sources and departments, and monitor the time taken throughout the hiring process.

## 2. Key Performance Indicators

| KPI | Value | Description |
|---|---|---|
| Total Applicants | 100 | Total applicant records |
| Total Hired | 28 | Candidates reaching Hired |
| Dropped & Rejected | 72 | Candidates not reaching Hired |
| Overall Hire Rate | 28.00% | Hired ÷ Applicants |
| Average Time-to-Hire | 26.64 days | Average time-to-hire |
| Average Days per Stage | 5.55 days | Average stage duration |

## 3. Recruitment Funnel Performance

| Stage | Candidates | Stage Conversion |
|---|---|---|
| Applications | 100 | 100.00% |
| Screening | 67 | 67.00% |
| Interviewed | 48 | 71.64% |
| Offered | 34 | 70.83% |
| Hired | 28 | 82.35% |

The recruitment funnel starts with 100 applications and results in 28 hires. The Offered-to-Hired stage has the strongest conversion at 82.35%.

## 4. Recruitment Source Analysis

| Source | Applicants | Hired | Hire Rate |
|---|---|---|---|
| Company Website | 28 | 10 | 35.7% |
| Referral | 24 | 7 | 29.2% |
| Indeed | 22 | 6 | 27.3% |
| Job Fair | 14 | 2 | 14.3% |
| LinkedIn | 12 | 3 | 25.0% |

Company Website produces the highest number of hires and the highest source-level hire rate. Job Fair has the lowest source hire rate among the sources shown.

## 5. Department Analysis

| Department | Applicants | Hired | Hire Rate | Avg Days/Stage |
|---|---|---|---|---|
| Sales | 25 | 8 | 32.0% | 6.08 |
| Finance | 24 | 8 | 33.3% | 5.92 |
| HR | 18 | 6 | 33.3% | 5.39 |
| Marketing | 18 | 3 | 16.7% | 5.00 |
| Engineering | 15 | 3 | 20.0% | 4.07 |

Finance and HR have the highest department-level hire rate at 33.3%, while Marketing has the lowest at 16.7%. Sales has the highest average days per stage among the departments shown.

# 6. Recruitment Process & Time Analysis

| Stage | Average Days |
|---|---|
| Applications | 5.64 |
| Screening | 5.25 |
| Interviewed | 5.31 |
| Offered | 5.94 |
| Hired | 6.19 |

The dashboard reports an average time-to-hire of 26.64 days and average days per stage of 5.55 days. The Hired stage has the highest average stage duration at 6.19 days.

# 7. Dropped vs Rejected by Stage

| Stage | Rejected | Dropped |
|---|---|---|
| Applications | 16 | 17 |
| Interviewed | 11 | 3 |
| Screening | 6 | 13 |
| Offered | 3 | 3 |

The stage-level dropped and rejected counts provide additional detail on candidate outcomes at different stages of the recruitment process.

# 8. Key Insights

- The recruitment funnel reduces from 100 applications to 28 hires, giving an overall hire rate of 28%.
- The largest volume reduction occurs before Screening, where 100 applications reduce to 67.
- The Offered-to-Hired stage has the strongest stage conversion at 82.35%.
- Company Website generates the highest hiring volume, with 10 hires, and the highest source hire rate at 35.7%.
- Finance and HR have the highest department hire rate at 33.3%, while Marketing has the lowest at 16.7%.
- Sales has the longest average stage duration at 6.08 days, while Engineering is fastest at 4.07 days.
- The Hired stage has the highest average stage duration at 6.19 days, followed by Offered at 5.94 days.
- Final candidate outcomes are 36 Dropped, 36 Rejected and 28 Hired, totaling 100 applicants.

# 9. Recommendations

1. Investigate the Applications-to-Screening drop-off by reviewing application quality and screening criteria.
2. Prioritize optimization of Company Website and Referral sourcing because of their comparatively strong outcomes.
3. Review Marketing's low hire rate to identify possible issues in applicant quality or stage conversion.
4. Review later-stage processing to identify opportunities to reduce time spent on approvals, offers and related activities.
5. Compare department cycle times and identify practices used by faster-performing departments.
6. Track hire rate, source performance, department performance, stage conversion and time-to-hire regularly.

# 10. Conclusion

This Power BI project provides an interactive view of the recruitment process from application to hiring. The analysis helps identify recruitment funnel drop-offs, compare the performance of different sources and departments, and understand the time taken at each recruitment stage. The insights can support improvements in candidate conversion, recruitment efficiency and overall hiring performance.
